

REEF SIDE CHAIR

OUTDOOR FURNITURE

PLASTIC STACKABLE OUTDOOR CHAIRS Update your patio seating with this stacking commercial outdoor chair. The Reef Side Chair can be added to a table of your choice or used as extra seating when hosting events in your backyard. These plastic outdoor chairs are ideal for stacking and storing away while not in use. The chairs have slatted backrests for optimal support when sitting upright—plastic outdoor chair in a loose interpretation of the classic Marine chair. This design, for example, draws on modern aesthetics to offer a streamlined silhouette perfect for the contemporary outdoor space. This industrial plastic chair is the weather, water, UV, rust, and mildew resistant, perfect for year-round use. To clean, we recommend washing with mild soap and water, rinsing with a hose. This commercial outdoor chair arrives ready to use, with no assembly needed. Reach us to know more about the Reef Side Chair design at UHS International.
