

# REGAN BARSTOOL

#### TABLE PLACE CHAIRS

WIRE FRAME BARSTOOL The Regan Barstool is a companion to our original Arco Sled Side Chair. Both plywood chairs are suitable for cafes or restaurants and can be used separately or in conjunction with each other, maybe for a different seating area within the same interior. The bent plywood chair and lightweight, high wireframe bar stool are both made from formed beech ply with a steel wireframe. They are also available with an oak or upholstered in a variety of fabrics and leather. The Regan Barstool is a classic wire frame barstool with a ply-formed seat. Powder-coated in a standard RAL with the stained seat to a standard finish. The metal barstool with a wood seat is ideal for coffee counters, bars, poseur tables, and raised window seating. To elevate the appearance of your interiors, we highly recommend investing in this wooden seat metal frame bar stool manufactured by Table Place Chairs. Contact us to find out more about this wood seat metal wire frame barstool at UHS International.
